

Malik Afan

Junior Software Engineer | Full-stack (backend focus)
iam.malikafan@gmail.com | github.com/iam-malikafan | linkedin.com/in/malikafan | Pakistan

SUMMARY

Junior software engineer working full-stack with a backend focus. I build APIs, services and automations in Python and Node.js, deploy and run them on Linux servers, and handle the frontend when a project needs it. Passionate about clean code and AI-powered automation.

SKILLS

Backend:	Python, Node.js, Express, REST APIs
Databases:	MySQL, SQL, SQLite
Frontend:	HTML, CSS, JavaScript
Tools & Ops:	Linux, Git, Server Deployment
Focus:	AI Automation

EXPERIENCE

Junior Software Engineer - Software House

2025 - Present
Building and maintaining backend services and full-stack features; learning production workflows.

Self-taught Developer

2023 - 2025
Learned programming fundamentals and backend development with Python and Node.js through self-study and practice projects.
